DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-9 and 19-23 are drawn to a method and system for exploiting discount opportunities relating to invoices billed from a supplier to a buyer comprising the steps of; identifying invoices, providing information related to the invoices, receiving bids and selecting winning bidder.

Invention II: Claims 10-18 are drawn to method and system for exploiting discount opportunities relating to invoices billed from a supplier to a buyer comprising the steps of; inputting relevant data from all invoices, searching the database, generating a report and utilizing the report to pay the discount price.

2. The inventions I and II are distinct, each from the other because of the following reasons:

Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I includes steps that results in selecting a winning bidder, whereas invention II includes steps that results in generating a report utilized to pay the discount price. The method of invention I can be performed by a system configuration different from what is claimed in invention II. Hence invention I has a different utility and scope than invention II. Because these inventions are distinct for the reasons given above and the search

required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call attempt was made on July 24, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.
